**Watkins Glen State Park**

Glen Creek has carved a dramatic gorge into the Watkins Glen hillside, resulting in a large, cavern-like network of rock formations. Within two miles, the glen's stream descends 400 feet past 200-foot cliffs, generating 19 waterfalls along its course. The gorge path winds over and under waterfalls and through the spray of Cavern Cascade.

**or Secret Caverns**

A 103-step staircase with various layers of limestone deposited faithfully by the prehistoric ocean is the only way in or out. Many of the caverns in this area were formed largely during the last Ice Age about 38,000-14,000 years ago. "For thousands of years, mineral-laden water has been precipitating on the walls, ceiling, and floor of the caverns, leaving behind great deposits of golden calcite. When these deposits hang from the ceiling like icicles, they are called stalactites. When they build up from the floor, they are called stalagmites. And when you see calcite dripping down over the walls or covering the rocks, that is called flowstone." – You will have a wonderful time with all the views mentioned!

**The Corning Museum of Glass**

In western New York is dedicated to the history, art, and science behind glassmaking. Its

### **Night**

#### **Niagara Falls Night Tour**

Get closer to America's Oldest State Park at Niagara Falls State Park! Enjoy some awe-inspiring sceneries and adventure-packed experience with us! Niagara Falls is actually not one waterfall, but three. The Niagara River flows down from Lake Erie and is divided by Goat Island. There, part of it flows to the horseshoe-shaped Canadian Falls (aptly named Horseshoe Falls), and the rest flows to the American Falls. At the American falls, the river is also split by a second small island, Luna Island, creating the third, small waterfall known as Bridal Veil Falls.
